MARKET STUDY · SINGAPORE BUILT ENVIRONMENT

Construction ERP in Singapore

Singapore contractors run the money on a local ERP and the site on a separate field app, and nothing connects the two. The opening is a SOPA-native “claims-to-cash” layer that turns site progress into payment claims and InvoiceNow e-invoices.

Prepared by Dinesh Bharathi · As of 13 October 2026 · Prices from public sources; most vendors quote privately, so treat figures as ranges.

Summary

70%
of A1 contractors use Novade for permits to work

150+
construction clients claimed by Synergix, the local ERP leader

Apr 2031
all GST-registered firms must e-invoice via InvoiceNow

S$50k
BCA Built Environment PSG cap for digital solutions (up to 50%)

- **Market structure:** local customised ERPs (Synergix, HashMicro, Multiable) serve SMEs; global cloud ERPs (NetSuite, Dynamics 365, Acumatica, Odoo) serve mid-size firms but lack Singapore construction logic; SAP serves the largest groups; Novade and Procore run the site.
- **Prices:** from about USD 3,000 a year in licences (Odoo, 15 users) to USD 15,000–80,000 a year (Procore). Local ERPs charge SGD 13,000–40,000+ per implementation.
- **Buying triggers:** the InvoiceNow mandate and grants. Enterprise Singapore's PSG became EDGE on 30 Sep 2026; BCA's construction PSG runs until Dec 2026.
- **Biggest gaps:** field-to-finance disconnect, no SOPA-native claims tool at SME price, subcontractors priced out, no claim-to-e-invoice automation, renewal price shocks after the

grant year.

- **Recommended play:** build the claims layer first, integrate with existing accounting, land via main contractors and onboard their subcontractors free, get grant-listed, then expand toward full ERP.

What a Singapore construction ERP must handle

Six local requirements decide every deal. Generic accounting software covers almost none of them.

REQUIREMENT	WHAT THE SOFTWARE MUST DO	ENFORCED BY
Security of Payment Act (SOPA)	Payment claims and responses, retention, variations, back-charges, statutory deadlines (payment due 35 days after a claim; response typically within 21 days)	Statute; adjudicatio at Singapore Mediat Centre
GST InvoiceNow	Send structured Peppol invoice data to IRAS. Mandatory for new voluntary GST registrants from 1 Apr 2026, all GST-registered firms by 1 Apr 2031	IRAS / IMDA
Electronic Permit to Work	Mandatory for main contractors on public projects of S$3M or more; keep records 5 years	MOM (WSH Act)
Foreign Worker Levy & CPF	Payroll for levy tiers and CPF across a largely foreign site workforce	MOM / CPF Board
BCA Integrated Digital Delivery	BIM data exchange between project stakeholders	BCA
Grant pre-approval	SMEs buy almost only from pre-approved vendors because grants cover up to 50% of cost	BCA / Enterprise Singapore / IMDA

The missing link: site to money

A progress claim starts on site, becomes a legal document with a deadline, and ends as a tax invoice. Today two different products cover the two ends, and the middle runs on Excel.

1 · SITE	2 · LEGAL	3 · LEGAL	4 · TAX	5 · FINAN
Progress, manpower, materials	**SOPA payment claim**	**Payment response / certificate**	**InvoiceNow e-invoice**	**Books, codes, c**

Novade | No product owns this · Excel + QS hours | Synergix / other ERPs

Coverage is the research view of where each leader is strong, not a claim that the other steps are impossible in those products.

Vendors: pros, cons and price

Twelve products matter. Rankings published on Programming Insider, e27 and ERP Today place Multiable first and link to Multiable's site; HashMicro's blog ranks HashMicro first. Points from those sources are marked vendor-sourced.

All | Local ERP | Global ERP | Site & field | Niche

Synergix

Local ERP · incumbent since 1990

150+ construction clients claimed, including Woh Hup, BHCC, Obayashi Singapore, Ley Choon and Poh Wah.

PROS

- Deepest local construction workflows: cost-code budgets, subcon advance offset, auto back-charges
- IRAS-registered accounting
- Long-time grant pre-approved vendor
- Strong support reputation

CONS

- Priced per implementation; every client is a custom project
- Learning curve and long rollouts
- Only one public verified review
- Weak field app; firms add a second tool

PRICE SGD 13,000–40,000+ implementation, plus subscription

HashMicro

Local ERP · marketing-led challenger

Modular cloud ERP with tender/BOQ, budgets, procurement, site inventory, subcontractor billing and S-curves.

PROS

- Broad construction feature list
- ERP, HR, CRM and assets in one vendor
- Easy to find and demo

CONS

- Opaque per-feature pricing
- 8–9 public reviews, all 5/5, mostly manufacturing
- Few independent Singapore construction references

PRICE Not published; one-time per module

Multiable aiM18

Regional ERP · Hong Kong

6,000+ Asian customers; IRAS Accounting Software Register listing with GST F5 and audit-file output.

PROS

- IRAS ASR-registered
- No-code workflow setup
- Direct vendor support vendor-sourced

CONS

- Extra charge for weekend support
- Priced above firms under 10 staff
- No named Singapore contractor case studies found

PRICE Not published; quote

eBUILD & ProjectVIEW

Minor construction ERPs

Listed on Capterra Singapore. ProjectVIEW targets large contractors and marine/offshore yards; eBUILD targets developers and contractors.

PROS

- Construction-specific from the start
- Cloud delivery

CONS

- Little public Singapore customer data
- No public pricing

PRICE Not published

Oracle NetSuite

Global cloud ERP

Chosen by mid-size and regional firms that need multi-entity consolidation.

PROS

- Strong multi-subsidiary, multi-currency
- Mature platform and partner base
- Has had fixed-price grant packages

CONS

- No out-of-box SOPA claims or retention
- Renewal price increases; cost is top complaint
- Construction needs add-ons

PRICE Past 5-user grant package: SGD 23,005 year one after discounts

Dynamics 365 Business Central

Global cloud ERP · Microsoft

The default for firms already on Microsoft 365.

PROS

- Office, Teams and Copilot integration
- Transparent per-user price; cheap light-user seats
- Large Singapore partner base

CONS

- No construction module out of the box
- List price rose Nov 2025 (USD 70→80)
- Cannot mix Essentials and Premium users

PRICE USD 80 / 110 / 8 per user per month, plus partner

Acumatica Construction

Global cloud ERP · US

Dedicated construction edition with job costing and change orders.

PROS

- Unlimited users, resource-based pricing
- Real construction edition with mobile field access
- Bundled fixed-price package

CONS

- US billing logic, not SOPA
- Weak on CPF and levy vendor-sourced
- Small Singapore reseller network

PRICE From under USD 1,500/month incl. implementation and support

Odoo

Open-source ERP

Popular with cost-conscious SMEs; Singapore gets a low regional price list.

PROS

- Cheapest licence in the market
- All apps included; mobile-friendly
- Free Community edition

CONS

- No native SOPA or retention; partners build it
- Partner quality varies widely
- Custom code makes upgrades painful

PRICE USD 16.90–25.50 per user per month (SG list), plus partner

SAP S/4HANA

Tier-1 ERP

For the largest contractors and government-linked groups.

PROS

- Deepest controls and audit trails
- Scales to mega-projects

CONS

- Multi-year implementations
- Very high total cost; specialist consultants

PRICE Enterprise quote; not relevant to SMEs

Novade

Field platform · Singapore, 2014

The site leader: safety, quality, progress and permits to work.

PROS

- 70% of A1 contractors for permits; 200K permits a month
- Compliant ePTW with offline mode

CONS

- Not an ERP: no accounting, billing or claims
- Attendance and timesheets only on Enterprise
- Clients skew to large contractors

- Supplies PUB, DSTA, PA, BCA; SG data centre
- Free for 5 users and 5 projects

PRICE Free · Standard from USD 39/user/month · Premium & Enterprise on quote

Procore

Construction PM · US, ASEAN hub in SG

Best-in-class project management for large and multinational contractors.

PROS

- RFIs, submittals, drawings, change orders
- Unlimited users
- Large integration ecosystem

CONS

- Bill grows with your revenue
- 10–14% renewal increases commonly reported
- No SOPA or InvoiceNow localisation found

PRICE USD 15,000–30,000/yr small, 30,000–80,000 mid-size (third-party estimates)

Chillaccount & Payapps

Niche tools

Chillaccount is low-cost accounting for small subcontractors. Payapps is an Australian claims platform used by 34 of Australia's top 50 builders.

PROS

- Chillaccount: cheap and simple
- Payapps: proves a claims-only product can win a market

CONS

- Chillaccount: limited past ~50 staff vendor-sourced
- Payapps: no Singapore SOPA version found

PRICE Payapps from AUD 49 per contract per month

Comparison matrix

No product is strong on all three things an SME contractor needs at once: construction finance, Singapore compliance and a field app crews will use. Ratings are judgements from the research.

PRODUCT	BEST FOR	CONSTRUCTION FINANCE	SG COMPLIANCE	FIELD APP
Synergix	SME–mid main contractors	Strong	Strong	Weak
HashMicro	SME–mid, multi-industry	Partial	Partial	Partial
Multiable	Mid-size, 10+ staff	Partial	Strong	Partial

aiM18				
NetSuite	Mid-size, multi-entity	Weak	Partial	Weak
Dynamics 365 BC	Microsoft-centric	Weak	Partial	Weak
Acumatica	Many users	Partial	Weak	Partial
Odoo	Cost-sensitive SMEs	Weak	Partial	Partial
SAP S/4HANA	Largest groups	Strong	Strong	Partial
Novade	Safety-led main contractors	None	Strong (ePTW)	Strong
Procore	Large GCs	Partial	Weak	Strong
Payapps	AU subcontractors	Strong (AU)	None for SG	None
Chillaccount	Small subcontractors	Weak	Partial	None

Pricing and grants

A 15-user contractor pays about USD 3,000 a year (Odoo) to USD 30,000 a year (Procore) before implementation, and grants only fund the first year.

Published licence cost, 15 users

PRODUCT	BASIS	ANNUAL, USD
Odoo	USD 16.90–25.50 per user/month	3,042–4,590
Novade Standard	USD 39 per user/month; 25% off yearly	5,265–7,020
Dynamics 365 BC	USD 80–110 per user/month	14,400–19,800
Acumatica APEX	Bundled, incl. implementation and support	up to ~18,000
Procore	% of construction volume, unlimited users	15,000–30,000

Five pricing models

- **Per implementation:** Synergix, HashMicro, Multiable
- **Per user per month:** Dynamics, Odoo, Novade
- **Base + users + setup:** NetSuite
- **Unlimited users:** Acumatica
- **% of construction volume:** Procore (about 0.1–0.2% of hard costs)

Hidden costs

- Renewal increases (Procore 10–14%; Microsoft about 14% in Nov 2025)
- Partner fees for construction customisation
- A second system for the field
- Paid weekend support (Multiable)

Grants as of October 2026

GRANT	SUPPORT	CAP	CATCH
BCA Built Environment PSG	Up to 50%, local SMEs	S$50,000 per firm (digital), 2026–2031	Moves into EDGE in Dec 202
EDGE single-function solution	Up to 50%, SMEs	S$20,000 cost (S$10,000 grant)	Software covered 12 month only; no maintenance
BCA BETC Grant	70% SME / 50% non-SME to Mar 2027	Case by case	For multi-year transformati
InvoiceNow-ready solutions	Free to SMEs	Until Mar 2031	E-invoicing only

Enterprise Singapore's PSG ceased on 29 Sep 2026; EDGE took over on 30 Sep with a S$100,000 yearly cap per company.

What is missing

Eight gaps stand out. The first, second and fourth compound into the single biggest

opportunity.

GAP 1

Field and finance are split

Novade has no billing; Synergix has no strong field app. Firms run both, joined by Excel.

Main contractors with 5–50 projects

GAP 2

No SOPA claims tool at SME price

Payapps does this in Australia; no Singapore version found. QS teams track claims in spreadsheets.

Subcontractors, QS teams

GAP 3

Subcontractors priced out

Synergix starts at SGD 13,000; Procore scales with revenue; Odoo needs a paid partner.

Trade and M&E firms under 50 staff

GAP 4

Claim → InvoiceNow is manual

Tax invoices follow certified amounts. No vendor shows an end-to-end claim-to-e-invoice flow.

Every GST-registered contractor to 2031

GAP 5

Foreign-workforce operations are thin

Novade attendance is Enterprise-only; lower plans offer English, French and Bahasa only.

Contractors with large foreign crews

GAP 6

Opaque pricing, long rollouts

Local ERPs quote per implementation and customise every install.

First-time ERP buyers

GAP 7

Renewal shock after the grant year

Grants pay year one; Procore and NetSuite renewals rise.

Every grant-funded buyer

GAP 8

AI is marketing, not workflow

Chatbots and form builders exist; nobody checks a subcon claim against measured progress and drafts the response.

QS and contracts teams

How we address the gaps

> **Don't build another full ERP first.** Build the claims-to-cash layer — site progress → SOPA claim → certified amount → InvoiceNow invoice — that plugs into the accounting system a contractor already uses. Then grow into cost control and full ERP.

Gap-to-feature map

GAP	FEATURE	WHY IT WINS
Field/finance split	Mobile site diary posting to cost codes and claim lines	One entry on site updates budget and next claim
No SOPA claims	Claim and response builder with retention, variations, back-charges and deadline alerts	A missed SOPA deadline cos real money
Main ↔ subcon exchange	Portal where subcontractors submit claims free	Each main contractor brings subcontractors
Claim → InvoiceNow	Certified amount becomes a Peppol tax invoice via an access point	Rides the mandate to 2031
Foreign workforce	QR/face check-in in Bengali, Tamil, Chinese, English, feeding cost codes and payroll	Languages incumbents' entry plans lack
Opaque pricing	Self-serve signup, published prices, SIA/PSSCOC/REDAS templates	Live in days, not months
Renewal shock	Multi-year price lock	Counters the top NetSuite/Procore complaint
AI as workflow	AI reads incoming claims, matches to progress, flags over-claims, drafts responses	Saves QS hours every month

flags over-claims, drafts responses

Pricing proposal (to validate)

CUSTOMER	PRICE (SGD)
Subcontractor submitting to a paying main contractor	`Free`
Subcontractor Pro, unlimited users	`49–99/mo`
Main contractor, per active project	`300–600/mo`
Mid-size, annual	`Tiered, 3-yr lock`

Package one bundle under the EDGE S$20,000 cost cap and a larger one within the BCA S$50,000 cap.

Go-to-market

- **Target:** SME main contractors below A1, plus their trade and M&E subcontractors
- **Grant-list first:** pre-approval under BCA's digital plan and EDGE
- **Land via the main contractor:** onboard its 20–50 subcontractors free
- **Channels:** QS consultancies, accountants, corporate-secretary firms
- **Lead with InvoiceNow:** every IRAS date notice is a buying trigger
- **Proof:** named case studies with measured outcomes

Differentiation

VERSUS	OUR EDGE
Synergix	Self-serve, published prices, strong mobile field app, live in days
Novade	Owns the money side — claims, certificates, invoices
Procore	SOPA and InvoiceNow native; flat per-project price
Odoo / Dynamics / NetSuite	Construction logic out of the box, no partner customisation

Build roadmap

MONTHS 0–4

MVP

SOPA claim and response builder, retention, variations, deadline alerts, PDF output, Xero/QuickBooks sync.

Gate: 5 paying contractors running real monthly claims

MONTHS 4–8

Network

Subcontractor portal, mobile site diary, attendance check-in, multilingual UI.

Gate: 3 main contractors, each with 10+ active subcontractors

MONTHS 8–12

Compliance

InvoiceNow via an access point, grant pre-approval listing, IRAS-aligned audit trail.

Gate: listed as a pre-approved solution

MONTHS 12–24

Expand

AI claim assessment, cost-to-complete, procurement and materials, Novade and ERP connectors.

Decision: become the full ERP, or stay the best-in-class layer

---

Risks and next steps

Risks

- **Incumbent response:** Novade could add claims; Synergix could add a field app
- **Grant transition:** BCA's PSG moves into EDGE in Dec 2026; rules may change
- **Small market:** plan Malaysia and Indonesia from the start
- **Legal precision:** SOPA logic needs a construction lawyer's review
- **Site adoption:** offline mode and simple UI are mandatory

Next steps

- Interview 10 contractors (5 main, 5 subcon) and 3 QS firms on the claims process
- Map the SOPA claim → response → adjudication timeline with a lawyer
- Talk to two InvoiceNow access points about partnership
- Get real quotes from Synergix, HashMicro and Novade to confirm price ranges
- Confirm requirements and lead time for grant pre-approval listing
